RE: INFORMATION REQUIREMENT, Section 308 of the Clean Water Act, 33 U.S.C. Section 1318  
to Washington Aqueduct, 5900 MacArthur Boulevard, Washington, DC 20016, Baltimore  
District, US Army Corps of Engineers

Dear Mr. Seligman:

The following information is submitted in accordance with the subject request for information letter dated January 6, 2016. In our February 12, 2016, letter to you we said we would send monthly updates as of the 15<sup>th</sup> of the month reporting on dredging activity at the Georgetown sedimentation basins in the prior 30 days.

This update is for the period June 16, 2016 through July 15, 2016.

In-house dredging continues at Georgetown basin #2. In this period we have dredged 430,190 pounds of solids, which is approximately the same as we collected in the previous reporting period.

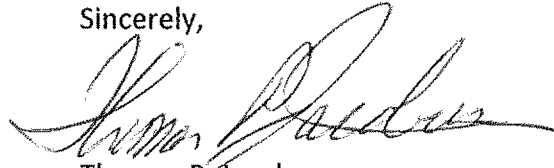

The contract to the commercial dredging company selected to remove the sediment from outside the range of the in-house cable-guided dredge was issued on June 29, 2016. The contractor will have the dredge on site on August 1 and will begin dredging as soon as the cables and hoses are connected. We estimate that this will occur on or about August 4, 2016. This dredge will catch up on removing the sediment in the range of the in-house dredge and will also do dredging outside this range to remove the maximum quantity of sediment from the basin as possible.

Proudly Providing Water to the Nation's Capital Since 1853
